## 1 Introduction

How nice that you are interested in the elite sports policy. This document has been written for the students and staff.

The University of Applied Sciences Utrecht (HU) aims to promote (professional) quality, strives to educate talented students and to enable them to achieve their potential. Elite sports athletes are a special group in this context. They are role models in sport for young people, adults and fellow students. They encourage people to exercise, to play sports and to achieve results. Elite sports student also stand for values such as striving for excellence, result-orientation and entrepreneurship.

HU is an institution that supports elite sports athletes. However, it is not an elite sports university that can offer fully customised services. Supporting elite sports students is improving, but requires a lot of communication from you as an elite sports student.

### 1.1 History of HU elite sports policy

Since 1984, HU has been facilitating elite sports students by supporting and advising on the coordination between the elite sports scheme and study programmes. Initially, this only concerned Physiotherapy students. In 1998, the HU Executive Board (CvB) signed the policy document to facilitate elite sports students HU wide.

- In 2013, the HU, together with 12 universities and 13 universities of applied sciences and the Dutch Olympic Committee & Dutch Sports Federation (NOC\*NSF) with the support of the Ministry of Education, Culture and Science (OC&W)/Health, Welfare and Sport (VWS) signed the [Action Plan Flexible Education and Elite Sports \(FLOT\)](#). Effort obligations were agreed upon with regard to the facilities that should be present within these institutions in order to optimally facilitate elite sports athletes in their study objectives. Part of this is the appointment of an Elite sports coordinator for each institution. Another component is that it is desirable for elite sports to form part of the education and examination regulations (OER) of the educational institution. In 2019, HU signed FLOT 2.0.
- Elite sports has been included in the [OER](#) since the 2017-2018 academic year (Chapter 5.4 2024-2025),
- Since 2018 in the [Student Financial Support Fund](#),
- Since 2020 you can apply for an honors certificate (by reflecting on you enhanced planning,- organizational and communication skills) and a certificate for the dual career elite sports and study programme, and
- since 2022, e-sportsmen with a contract with a professional elite sports organisation can also apply for HU elite sports status.
- In 2025 HU together with 30 institutions for Higher Education and NOC\*NSF with the support of the ministries of OC&W and VWS signed [FLOT 3.0](#). For the first time, FLOT 3.0 includes minimum quality requirements for both the sports sector and higher education institutions. Further flexibility for elite sports student athletes, evaluation, and monitoring of dual development and the effectiveness of FLOT are part of this.

So you see that the elite sports policy is embedded in our regulations. Could you be one of our elite sports athletes? Find out if you are eligible and what it could mean for you.

### **1.2 Current practice and contact persons for guidance**

The Elite sports coordinators provide information to potential elite sports students and their supervisors, conduct intake interviews and then, in cooperation with the student counsellors (decanen), study career counsellors (SLB-ers) and learning team coaches, provide personal guidance and advice. The formal elite sports status is a prerequisite for support and advice. Many elite sports students find their way to HU. In the last three years, the number of students has fluctuated between 90-130. The Elite sports coordinators of the HU are Lenneke de Jeu and Brigitte van Barneveld. Lenneke has been working in this position since September 2014 and Brigitte since 2021. You can reach them both most easily via the email address [topsport@hu.nl](mailto:topsport@hu.nl).

### **1.3 Objectives of HU elite sports policy**

The objective of the elite sports policy is to facilitate the combination of study and elite sports for students at HU who have been identified as elite sports athlete students, where possible and within reasonable limits. The right to facilitation cannot lead to the obligation of the study programme to do the impossible. But we can look together at the possibilities that do exist.

## 2 Criteria and procedure for obtaining a HU Elite sports status

### 2.1 Criteria for obtaining a HU elite sports status:

1. Students with NOC\*NSF status automatically receive an elite-sports status within UAS after registration. NOC\*NSF determines the statuses of elite athletes and records them in the [NOC\\*NSF portal](#). If the elite athlete has given [NOC\\*NSF](#) permission, the status is also visible to educational institutions. For this, see <https://nocnsf.nl/topsport/voor-topsporters/topsportstatussen>.
2. The awarding of elite-sport status by UAS Utrecht is broader than the NOC\*NSF status policy, but in accordance with national guidelines within [Action Plan FLOT](#). This means that you can also obtain elite-sports status if you practice a sport recognized by NOC\*NSF and practice your sport at the highest level, such as participating in European (youth) championships (E(J)C's), World (youth) championships (W(J)C's) and the Olympic Games, are a member of a National Top Sports Center (NTC), a Center for Top Sports and Education (CTO), are in the Dutch Junior Team and/or are considered an emerging talent.

Point 2 is further specified below. You can also apply for a UAS elite-sports status if you:

- do a sport on the list of **Elite sports category 1** [Elite and International Competitive Sports Disciplines](#) of NOC\*NSF:
  - individual sport: finished 1-8th place at the National Championship or participates in the European Championship/World Championship. You provide the result or invitation for this by email as proof.
  - team sport from Elite sports category 1, plays at the highest national level and is active in Europe. (These are the clubs that are at the top of the national competition, places 1-8). You need a letter from the club as proof of the status.
  - Part of team Orange or team NL
- do a sport on the list of **Elite sports category 2 or 3** [Elite and International Competitive Sports Disciplines](#) of NOC\*NSF:
  - Individual sport: finished 1-3 at the National Championship or finished 1-16 at the European Championship/World Championship
  - Team sport: part of team Orange. You provide the result or invitation for this as proof by email

Other specifications

- play professional football in the Netherlands and you are on the BVO (professional football organization) talent status list. Please contact the KNVB for this. The national training centers are on this list.
- cycle and meet: [Talent profiles & talent status KNWU](#) or have KNWU or NOC NSF status or are a member of a Continental team or have finished in the first 8 at the NK or NJK (HollandCup.). If this is not (yet) the case, you can qualify by receiving a letter from the KNWU. You do this by providing the correct information to the KNWU:
  - o document with general information
  - o document with competition results over the past 2 years
  - o document with test data (VO2max and wattages)
  - o document with power values (10 sec, 30 sec, 1 min, 3 min, 5 min, 12-20 min)
  - o recommendation from the club trainer
  - o recommendation from the regional coach/STDC person
  - o reason for the request for which the status is used.
- are an e-sporter with a contract with a professional top sports organisation (like FC Utrecht)
- Kickboxing: The Dutch Martial Arts Federation (NVB) currently does not have a central Dutch Championship that can serve as a benchmark. Therefore, they cannot yet issue a formal statement proving an athlete ranks among the national top 8 within a specific weight class. However, they can issue a statement for athletes who:

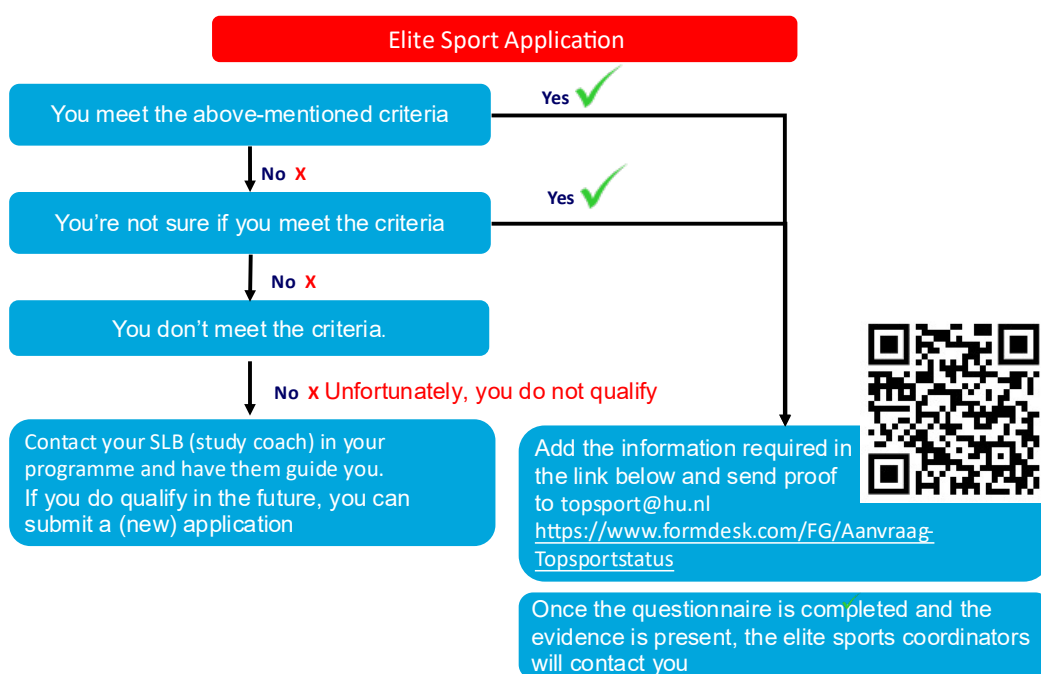

- demonstrably fight in the A-class (the highest amateur division in kickboxing in the Netherlands), or
- fight professionally with one of the three top international organizations: UFC (for MMA), Glory (for kickboxing), or ONE Championship.

Students should send this proof to [r.rijker@nederlandsevechtportbond.nl](mailto:r.rijker@nederlandsevechtportbond.nl) and request a statement to send to [topsport@hu.nl](mailto:topsport@hu.nl).

- practice motorsport and after the season can share the final ranking with a place 1-8 for you (because every competition is called a National Championship, the ranking after a season applies here),
- play for a national team other than the Netherlands in sports on the list of Elite sports category 1, 2 or 3 [Elite and International Competitive Sports Disciplines](#) of NOC\*NSF
- always had a status at younger age, if consecutive, the HU will give you 1 academic year to join the selection for the seniors as well
- had a long-term injury and have lost your status as a result, the HU will give you one academic year to come back to your old level. This requires a letter from the treating (sports) physician
- in other cases to be determined by the Elite sports coordinator(s).

The applications are examined per student. Based on the criteria, the student may or may not receive top sports status.

## 2.2 The procedure for obtaining a HU Elite Sports Status

- You apply to the Elite sports coordinators via referral from a dean (decaan), study career counsellor (SLB-er), teacher, learning team coach (leerteambegeleider) or on your own initiative
- You send an email to [topsport@hu.nl](mailto:topsport@hu.nl) and complete the questionnaire: <https://www.formdesk.com/FG/Obtaining-an-Elite-Sports-Status>
- You provide the requested evidence to [topsport@hu.nl](mailto:topsport@hu.nl) (for criteria see 2.1 above).
- The Elite sports coordinators will review your information and arrange an intake (1/2 hour)
- after which the Elite sports committee will decide whether or not you will get the elite sports status. The Elite sports committee consists of the two elite sports coordinators and the manager Student Participation in Decision-Making and Advice, Department of Education, Research and Student Affairs.

- The Elite sports coordinators inform the dean and you about the elite sports status by email with the Elite Sports Status as an appendix.
- Elite sports status is valid for one academic year and has to be re-established at the end of each academic year by sending new evidence to topsport@hu.nl, demonstrating compliance with the criteria mentioned above in 2.1.
- It is our wish that you share your progress and agreements with HU Elite sports coordinators every block. This can be done by e-mail or a meeting with the Elite sports coordinators.
- The regular student counselling is done by the study career counsellor (SLBer) and/or learning team coach.
- The guidance provided by the Elite sports coordinators is based on a demand-driven system. This means that it is mainly you who determines the frequency of contact. If you wish to use facilities, you are required to contact us frequently. We cannot provide facilities afterwards.

### 3 Facilities

The facilities on which the top athlete can call consist of:

- 1) Counselling by the Elite sports coordinators;
- 2) Flexible educational possibilities, as far as these can be realised within the study programme;
- 3) Financial support in case of special expenses.

These facilities are explained below.

#### 3.1 Coaching by the Elite sport coordinators

The HU Elite sports coordinators work closely with the study career counsellors (SLB-ers), learning team coaches and deans (decanen). The Elite sports coordinators are familiar with all the possible facilities that can be applied for, but they are not aware of all the contents of the various programmes. Good cooperation is therefore essential. Guidance from the Elite sports coordinators is demand-driven, to encourage you to function as independently as possible. In practice, the Elite sports coordinators brainstorm on the background and advise you and/or SLB-er and/or your learning teams coach. As mentioned earlier, it is our wish that you share your progress and agreements each block. You can do this by e-mail or a meeting with the Elite sports coordinators. Your SLB-er or learning team coach does the regular student counselling at the educational level.

#### 3.2 Possible flexible education options

Arrangements for flexible educational opportunities are intended to limit the delay in studies as a result of practising elite sport as much as possible. Each programme management looks at what can be organised. You, as a student, are not entitled to these arrangements. Make sure you receive written support from your study career counsellor (SLB-er) and/or learning team coach and/or Elite sports coordinators and make sure you have evidence ready as to why you need this arrangement (proof of competitions, international training camp, trainer's statement, etc.).

*Facilitation cannot lead to programme management being forced to do the impossible.*

*A helpful document is available (ask the Elite sports coordinators) explaining how to submit such a request to the examination committee. The Elite sports coordinators must support the request. Our email with support is a mandatory attachment to the request.*

#### Concrete proposals:

- **Participation in other classes**, request to lecturers and study career coach (SLB-er)  
If you cannot be present at the class due to elite sports commitments, you have the possibility to ask the lecturers of other classes whether you can attend the relevant class with them. When in doubt whether this should be granted, the SLB-ers and/or the Elite sports coordinators can be contacted for advice. At certain institutes, the coordinators of a subject are responsible for these kinds of decisions.  
*There is a helpful document to look at the schedules of parallel groups (ask the Elite sports coordinators).*

**Participation in other learning teams**, request from the learning teams coordinator and learning team coaches.

It is mandatory for many educational programmes to be present at the learning teams. This is because it is important to collect and provide feedback on personal and professional development. It is often not possible to switch learning teams during a block. Only with support from the Elite sports coordinators will an exception be made to switch **after** a block. Although switching is not desirable, it is sometimes unavoidable.

- **Adjusted obligation to attend** by request to the responsible module coordinator

According to Article 7.13t of the WHW<sup>1</sup>, mandatory attendance may only be required if it is related to the assessment. The program must therefore clearly state the purpose for which a student is required to attend. Once this purpose is clear, the program must also indicate the consequences if a student is unable to attend meetings on several occasions. It is also important to consider whether in-person attendance is necessary or whether online participation in a meeting/class is also possible.

If the consequences are not described, but attendance is required for testing, the student must submit a request to the examination committee for an exemption from the attendance requirement. You must then demonstrate how you demonstrate or have achieved the learning outcomes and/or competency in another way (competency-based testing). If the competency cannot be assessed in this way, this option is not available. However, it is preferable that you participate in other classes to meet your attendance requirement. Participating in other classes is not always possible for all types of lessons.

*In some cases, the athlete simply has to be present. These sessions are considered tests, and sometimes a learning-session is organized and offered only once. In these cases, the learning-session takes precedence over the training session. The learning team coach will thoroughly discuss which sessions of the mandatory lessons these are.*

- **Remote learning:** At the moment, this is not organised by lecturers. You have to arrange this with the lecturer and with other students that you can follow lessons remotely/online and by asking permission from the lecturer. The teacher can choose whether to approve this for which lesson.
- **Recording the lessons:** It is not automatically permitted to have lessons recorded or to record lessons yourself in connection with the General Data Protection Regulation (AVG). There are institutes that record lectures as standard.
- **Replacement practicals** by request to the module coordinator (option 1) or the Examination committee (option 2).  
If the dates for practicals (lessons that are part of the assessment) overlap with your competitions and/or training stage abroad, , there are two options:  
Option 1. The module coordinator will check if you can participate with a different class (this practical may be slightly different, but with the same learning outcomes).  
Option 2. If option 1 is not possible, the student must submit a request to the Examination committee for an extra opportunity. This can also be done before the regular exam if a student already knows that attendance is not possible. The examination board will then decide whether you will be given a separate practical or alternative assignment at a different time.
- **Examination regulation rescheduling examination** by request to the Examination committee  
If the first or second chance of an assessment/examination cannot be used because of a competition, selection training or training placement abroad at the same time, you may request an extra chance with the Examination committee. The Examination committee will ensure that the opportunity is offered within a reasonable period of time. In your request, indicate which time period is desirable for you.  
If the extra opportunity can be organised, it will be scheduled by the Assessment Organisation or the examiners by order of the Examination committee. You are obliged to confirm this offer by e-mail.

---

<sup>1</sup> Without prejudice to the other provisions of this Act, the Education and Examination Regulations shall set out the applicable procedures, rights, and obligations regarding education and examinations for each program or group of programs. (...) where necessary, the obligation to participate in practical exercises with a view to admission to take the relevant examination, subject to the authority of the Examination Committee to grant exemption from this obligation, with or without the imposition of alternative requirements.

- **Postponement of the deadline for handing in a report or other product within (option 1) of after (option 2) the examination period**

If the deadline for the test (handing in the report) cannot be met, you may request a postponement of the deadline. You do this request well in advance and propose a new hand-in date yourself.

Option 1: the newly proposed deadline will be within 2 weeks after the original test (submission) date, the teacher can still enter your grade in Osiris in a timely manner. This is at the discretion of the teacher, as this will shorten the grading time for you. If the teacher agrees, the teacher will arrange for an individual extension in Gradework (or another submission date) for you via the course coordinator.

Option 2: The new proposed deadline is AFTER the teacher grading time, or if the instructor's available grading time is too limited, the deadline falls in a different block/period of testing time. You then have to request another deadline to the Examination committee. The examination board will decide on the right to postpone, but the program must, of course, consult with the program coordinator to determine whether an alternative exam date is feasible, for example, due to additional testing facilities.

In both cases, the Elite sports coordinators must support your request. Our support email is a mandatory attachment to the request.

- **Individualisation of project/report**, by request to the course coordinator (option 1) or Examination committee (option 2).

When a project group cannot perform as expected due to your absence, it can be considered to do (part of) the project on your own. The group performance must then be converted into an individual performance. Whether this is possible depends on the learning outcomes of the relevant assessment. If these include a collaborative element, individual assessment is not possible.

Option 1: Learning outcomes without a collaborative element: the student completes the project alone.

Option 2: Learning outcomes with a collaborative element: the student submits a request to the Examination committee, and in consultation with course coordinator, the possibility of alternative individual assessment in the form of a replacement assignment will be assessed. Support from the teacher, course coordinator and Elite sports coordinators is required when submitting a request to the Examination committee.

- **Adjusted internship period** by request to the internship (work placement) coordinator.

If you are unable to meet the internship hours' standard due to your elite sport obligations, you seek for a solution together with the internship coordinator and internship office. You coordinate the solution with your internship teacher and the internship supervisor at the internship location. In practice, this usually means that you do a longer work placement with fewer hours per week. The development of competences during your internship can be looked at too. This is also known as competency-based testing instead of attendance-based testing. In the case of internships lasting more than 28 hours a week, 20 hours is the absolute minimum to ensure continuity and progression.

- **Internship abroad** by request to the internship coordinator.

If you have to stay abroad for your sport, it is possible to give you permission to follow your internship abroad. This requires permission from the work placement office and the work placement coordinator. A test may follow afterwards in the Netherlands to check whether the development of competences is sufficient.

Some study programmes having a compulsory traineeship abroad include the possibility of submitting a request to the work placement coordinator to take one of the traineeships at an international company in the Netherlands.

- **Suspended study recommendation:** See Education and Examination Regulations [EER](#)

- Remote testing:** Application for proctoring to the Examination committee.  
 Every year will be decided whether a proctored exam will be possible. Please check with the Elite sports coordinators.  
 If it is possible, students with an elite sports status who are unable to come to HU for a test and cannot wait for the resit may request the Examination committee to proctor an online remote test at the same time as the BYOD test or regular test on a permanent test PC. Please contact the Elite sports coordinator in time for this and add the support/statement from the Elite sports coordinator to your request to the Examination committee.

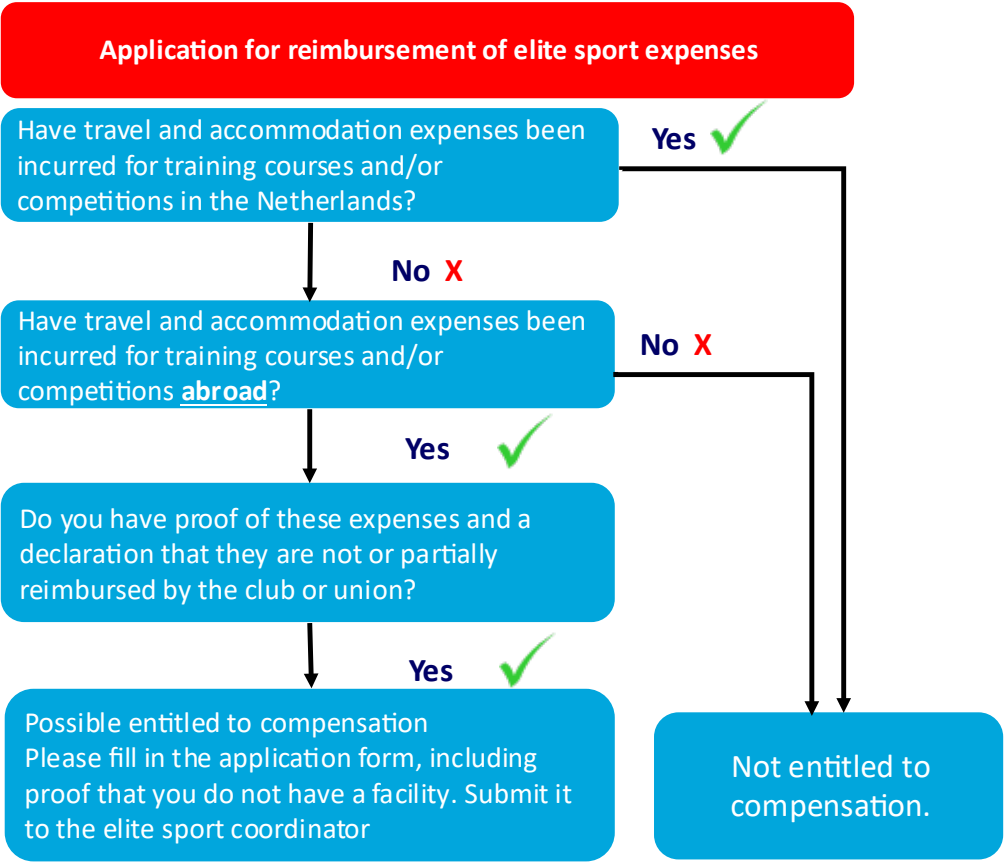

### 3.3 Financial support in case of special expenses

Per calendar year a limited budget is available for students with an elite sports status. If this budget is depleted, the possibility of financial support ceases.  
*Please ask the Elite sports coordinators for the necessary form to apply for the following.*

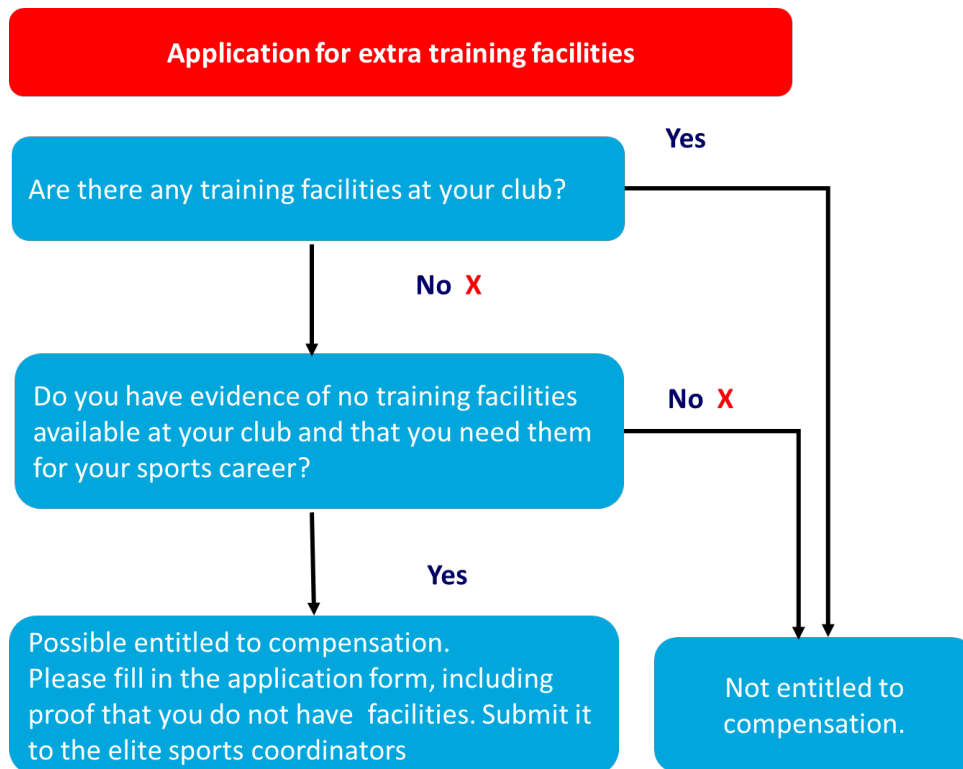

The financial support that can be applied for under certain conditions is:

- Application for reimbursement of expenses for elite sports, travel and accommodation abroad.
- Application for extra training facilities at Sport Center Olympos or Swimming pool Kromme Rijn This is only possible if you do not have the opportunity to train at your own sports club. You must demonstrate this and also how long you need this facility.
- Application for financial support for delay in studies (only **full-time** programmes) via the [Student Financial Support Fund](#).

Ad 3:

## 4 Elite Sports Recognition Certificate and an Honors Certificate

### 4.1 Elite Sports Recognition Certificate

It is possible to obtain an Elite Sports recognition certificate. The criteria and application are described in the document “Criteria and application for Elite Sports Recognition Certificate”. There is a form called “Certificate for Elite athletes NOCNSF status” en a form “Certificate for Elite athletes HU status”. You fill in the form yourself and send it to [Topsport@hu.nl](mailto:Topsport@hu.nl).

You can find these documents at [Elite sports and studying | HU Wegwijs](#). This Elite sports certificate look good on your curriculum vitae (CV).

### 4.2 Honors Certificate

HU has an interesting [honours programme](#). Honours is for students who want to achieve more potential and use their time wisely. To this end, the University of Applied Sciences Utrecht has developed an honours programme. Students can use [honours courses](#) (usually in the evenings) to deepen and/or broaden their study in an interesting way on top of their studies and obtain a star for it. However, it is also possible to obtain a star for your own in-depth and/or broadening activities. This is where elite sports comes in. As an elite sports athlete, you are always busy preparing well, planning your affairs, setting goals, arranging things so that you can combine your elite sports with your studies (comparing lesson and test schedules with your training and competition schedule, solving bottlenecks in advance in consultation with lecturers, study career counsellors (SLB-ers), student counsellor( decaan), Elite sports coordinators and, if necessary, the Examination committee). This requires extra focus, extra time and effort, and also a lot of extra communication in a careful manner. This is a challenge and also a valuable learning process. This learning process and this extra effort and enthusiasm is worth an Honours Star (an extra certificate to your diploma.

On of the [Stars](#) to be earned: the star Passion, the free star Organisation or Time management or the free star Communication. You can do this after investing at least 100 hours of time. The other criteria are: in-depth and/or broadening of the study, feedback from a relevant stakeholder with expertise, social value and/or of value to the profession and/or for personal development. You will keep a small logbook (A4) for this purpose. To apply, you need to fill in the form “Apply and assessment form honors achievements for elite sports” and send it, with attachments (e.g. the logbook and feedback from relevant persons) to [topsport@hu.nl](mailto:topsport@hu.nl). You can find the form at [Elite sports and studying | HU Wegwijs](#).

You will receive a Star certificate with your diploma. You can also apply for an [edubadge](#) (first make a backpack). The edubadge is internationally recognised and linked to your LinkedIn profile. Both the star certificate and the Edubadges look good on your CV.

## 5 Finally: Rules of play and guidelines for elite sports students

As an elite sports student, you are responsible for your own study progress. This also applies to taking the initiative to achieve a good balance between elite sports and study. If you are registered as an elite sports athlete student within the HU, you can make use of the HU elite sport scheme. The HU Elite sports coordinators will determine your elite sports status.

It is important that you handle the HU elite sports regulation with care, so that all elite sports students can continue to make use of this regulation in the long term. To this end, a number of rules have been drawn up. The guidelines below describe these rules and we expect you to put them into practice in a constructive way.

### Condition:

You will always provide proof of training times, training camps, competition periods and tournaments at the time when you appeal to the elite sports scheme.

Below, you will find a number of situations in which you, as an elite sports athlete, can make use of the elite sports scheme. At the same time, we indicate what the guideline is in that specific situation.

- ✓ Yearly timetable/order of study components in relation to elite sports:
  - For specific sports, there are specific periods in which a greater intensity and time investment in the sport is required (e.g. cycling, skating, sailing). **Prior to an academic year**, you make an appointment with the study career counsellor (SLB-er)/learning team coach or Elite sports coordinators to discuss how the academic year can best be structured. It is your duty to inform all parties.
- ✓ Overlap training times and college timetable:
  - You check your timetable prior to each class period (A, B, C, D). If there is an overlap between lectures and training times, you notify the study career counsellor (SLB-er)/learning team coach, lecturers and Elite sports coordinators, **at the latest one week before the beginning of the class period**. In consultation with the study career counsellor (SLB-er)/learning team coach or Elite sports coordinators, a possible solution will be sought. You are obliged to inform all parties involved.
- ✓ Short period of absence during a course period:
  - If a training camp, competition or tournament takes place during a class period and you are absent for a certain period of time, you must report this to the study career counsellor (SLB-er)/learning team coach, lecturers involved and Elite sports coordinators **no later than two weeks** prior to your absence.
  - In order not to get behind with studies, agreements will be made per course, in consultation with the lecturer, as to how your absence can be made up or compensated for. You take the initiative in this.
- ✓ Long period of absence during a course period:
  - If you are absent for a longer period of time due to elite sports commitments, the consequences of this will be determined in consultation with the study career counsellor (SLBer)/learning team coach and Elite sports coordinators. Subsequently, in consultation with the learning team coordinator, the programme manager and the Examination committee, it will be discussed whether an adjusted programme is possible. Obviously, this requires more time and **you are requested to report this longer absence in time**, so that tailor-made solutions can be found.
- ✓ Absence during examination period:
  - If you are unable to take part in an examination or examination period because of elite sports commitments, it is important that **you report this as soon as possible to the study career counsellor (SLBer), the learning team coach and the Elite sports coordinators**.

Depending on the elite sports obligation and the number of exams, possible solutions will be examined. You can submit a **request to the Examination committee** supported by the Elite sports coordinators.

- ✓ Agreements with lecturers, team leaders, etc.:
  - If, as a result of the above subjects, agreements are made with the lecturer(s), team leaders or programme managers involved, it is important that you, as an elite sports athlete student athlete, **carefully observe these agreements**. If, due to circumstances, you are unable to keep to the agreements made, it is important that you inform all parties involved (including the study career counsellor (SLBer)/learning team coach and the Elite sports coordinator **correctly**.
- ✓ Communication:
  - Perhaps needless to emphasise that it is of great importance that you communicate **correctly** at all times both via email and verbally with all those involved.
- ✓ Expectations:
  - The elite sports scheme provides the space to support you in the combination of sports and study. Making a claim on the elite sports scheme means that the organisation must make adjustments to the regular programme. This requires an effort from the organisation. The scope of the adjustments is not unlimited. It is possible that not all solutions will meet your expectations.
- ✓ Ambassador role:
  - As an elite sports student, you fulfil an ambassadorial role. The way in which you deal with the afore mentioned rules has an effect on all other elite sports students. If you deal with them in a constructive way, the cooperation of all elite sports students will be positively influenced. **If the above rules are adhered to, all elite sports students will be able to enjoy the HU elite sports scheme for a long time to come.**
- ✓ Registration requirement: Even if you are in your final year of study and have already made all the necessary arrangements, you are still required to register with the Elite sports coordinators. This way, the university will know how many elite sports students there are in the UAS Utrecht and you will ensure that guidance will continue to be possible in the future.
